University of
Sheffield

Tel: 01142227200

Email: library@sheffield.ac.uk

Opening Times:

Mon-Fri 9-7pm

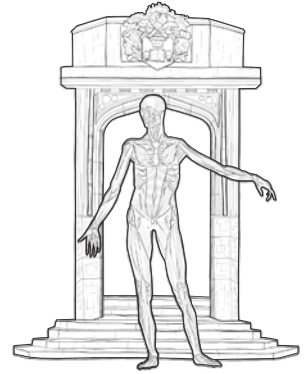

Sat-Sun 12-6pm

(excluding bank holidays)

Human Anatomy is the study of structures like muscles, vessels, nerves and bones to understand how our bodies function. The study of Anatomy has been at the core of understanding of what makes us human.

The teaching of anatomy has evolved considerably through the ages and this exhibition examines how the subject has been studied at Sheffield.

The exhibition begins with an investigation of the new technologies which are dramatically changing the way that anatomy is being taught at the University of Sheffield. It looks back to when anatomy teaching was often problematic and sometimes unpopular, and to 1904 when the subject was established at the University. Finally, the exhibition offers the opportunity to see centuries-old anatomy textbooks from our Rare Books Collection which show the pioneering science of the early anatomists and the technical brilliance of their illustrators and printers.
